Anno Wave 1.7.50 release

Monday, June 29, 2009 – AES, Inc. announces the release of Anno Wave version 1.7.50. This maintenance update repairs a few problems and adds some new features.

New Double Click Features
Double click on an annotation to conveniently open edit dialogs.

Set Cursor Positions Dialog
The Set Cursor Positions dialog will allow you set a value and automatically move the cursor to that value.

Cursor Style
The cursor style can be adjusted. This includes dot size, dash size and space between dots and/or dashes.

Cursor Draw Width
The cursor draw width can now be set independently of the draw width of the value text boxes.

Cursor Precision - improved
The precision of the cursors has been improved. In some situations it was not possible to move the cursor to an exact location. For example, sometimes moving to a value such as 540 resulted in 539 or 541.

Improved Dialogs
The Add New Annotation and Edit Annotations dialogs have been improved with the use of tabs.

Help File Update
The Help file has been updated to version 1.6.2.
